

Welcome page. User is required to log in with google.

Linked google accounts will appear if present, other wise user will need to provide google credentials

Varying levels of difficulty for User to choose from. Higher numbers correlate with harder mazes. Once level is selected a maze will be generated,

After the level is selected, the appropriate maze is drawn here. Each maze has a start and end point that the user must navigate the ball between. When the user completes the maze they are directed to the next screen.

Completion page with elapsed time stamp.

When the user successfully completes the maze, they will be able to choose another level

User will choose another level to play and be redirected to the level select page.

This screen can be accessed through the toolbar "My Stats" option. It show the user's stats for the game.
